

Press Release

ETL Group Company Profile

The ETL Group is represented by more than 900 firms in Germany, with an additional more than 1,300 offices in over 50 countries across the world. ETL is the market leader in tax consultancy and among the top five audit and tax advisory companies in Germany. With its business areas of tax consultancy, audit, legal advisory, management consultancy, and IT, the group generates turnover nationally of over 1,1 billion euros. In total, over 13,000 employees – including more than 1,500 tax consultants, lawyers, auditors, and management consultants – support more than 250,000 clients all over Germany. An interdisciplinary consulting approach and diverse industry specializations make ETL the ideal partner for companies, freelancers, and self-employed people in all sectors.

The roots of the company go back to the year 1971, when Franz-Josef Wernze started EKW-Treuhand GmbH and laid the foundation for the current ETL Group. Since 1995, the ETL Group has united tax consultants, lawyers, auditors, management consultants, and financial service providers under one umbrella.

Belonging to the ETL Group means that individual firms can work more efficiently than smaller competitors who lack this mutual support. With “Competencies that complement each other”, clients benefit from a complete service from start to finish. Their account manager draws on the expert knowledge of partners in the areas of tax, law, auditing, management consulting, and finance whenever needed. The group values proximity to its clients here. From small business owners and freelancers to internationally positioned medium-sized companies: ETL firms are always committed to the companies in their region.

Sector solutions for particular industries and stakeholder groups Specially developed sector solutions meet the particular requirements of specific stakeholders and branches of the economy (healthcare, hotels and restaurants, filling stations, senior citizens, professional athletes, agriculture and forestry, as well as franchise systems and e-commerce). They underline the company’s innovative power and market knowledge – today, the ETL Group is the market leader for both filling stations and the outpatient health sector.
